

MOHAMMED AHSAN

ASSOCIATE SOFTWARE ENGINEER

St.Micheal Road, Colombo 03, Sri Lanka | +94772805190 | mohamedahsan621@gmail.com
[LinkedIn](#) | [GitHub](#)

Motivated and detail-oriented Software Engineering undergraduate specializing in Machine Learning and Data Science. Skilled in Python, Java, SQL, and ML frameworks, with hands-on experience building predictive models for classification and regression. Proficient in data preprocessing, feature engineering, and model optimization to deliver scalable solutions. Adept at working in Agile teams, interpreting datasets, and translating insights into outcomes. Passionate about leveraging machine learning to solve real-world problems and enhance decision-making.

SKILLS

Professional Skills

Communication & Team Collaboration	UI/UX Design Principles	Analytical Problem Solving
Agile Development & Scrum Methodologies	Version Control with Git & GitHub	Wireframing and Prototyping

Technical Skills

Python, JAVA, HTML, CSS, JavaScript, SQL, AS400 iSeries (RPGLE IV, CLLE, COBOL, DB2/400), SpringBoot, DSA (Algorithm), React JS, Spring Boot, Machine Learning (Python), OOP, Git, GitHub, VS Code, IntelliJ IDEA.

PROFESSIONAL EXPERIENCE

Associate Software Engineer, HCL Technologies Lanka (PVT) LTD. OCT 2022 - MAY 2025

- Worked with DB200 using RPGLE IV, CLLE, COBOL, and SQL.
- Created and maintained backend services and batch jobs for core systems using Java.
- Participated in the development and maintenance of enterprise software applications for banking and insurance clients.

Web Developer (Freelance), TechSerandib Elite Solutions (PVT) LTD. OCT 2024 - APR 2025

- Worked as a developer using WordPress for dynamic website creation.

Internship - Software Engineer, HCL Technologies Lanka (PVT) LTD. APR 2022 - OCT 2022

- Trained in Java and SQL, with hands-on experience working on DB200 using RPGLE IV, CLLE, COBOL, and SQL.
- Developed sample mini-projects to practice CRUD operations and backend logic.

EDUCATION

B.Eng (Hons) in Software Engineering, Informatics Institute of Technology SEP 2022 – MAY 2027

- Pursuing B.Eng (Hons) Software Engineering (2022–2027) at IIT, affiliated with University of Westminster. Experienced in writing SQL queries and stored procedures for enterprise software.
- Collaborated in Agile teams, performed code reviews, maintained Java backend services, and supported legacy module migration to Spring Boot for better scalability and performance.

PROJECTS

Travidoo – Travel & Tourism Management Platform NOV 2025 - MAR 2026

- Developed a full-stack travel and tourism management platform to streamline tour discovery, booking, and travel-related services.
- Built responsive and interactive user interfaces with modern frontend technologies and integrated backend services for efficient data management.

7 Minutes POS System MAY 2026 - MAY 2026

- Developed a modern Point of Sale (POS) system supporting retail and business operations, including product, inventory, sales, and transaction management.
- Implemented barcode and QR code scanning and generation features to improve product identification and checkout efficiency.

Machine Learning & Data Mining – Breast Cancer Prediction

MAR 2025 - MAY 2025

- Developed predictive models using Logistic Regression, Naïve Bayes, KNN, and Decision Tree regression to classify breast cancer mortality and estimate survival months from the SEER dataset.
- Applied data preprocessing, feature selection, and hyperparameter tuning to improve accuracy and meet healthcare evaluation criteria (AUC-ROC, MAE, MSE).

Event Management System

SEP 2024 - NOV 2024

- Developed a full-stack Event Management System for ticket booking and vendor coordination. Built interactive UI using ReactJS and backend APIs with Spring Boot (Java). Integrated MySQL for structured data storage with secure authentication.

Bookstore Invoice System - Using AS400

AUG 2023 – DEC 2023

- Developed an invoicing and inventory management system for a bookstore using AS400.
- Built core logic using RPGLE IV and managed relational data with embedded SQL.
- Designed data structures, implemented transaction automation, and performed testing/debugging to ensure reliability.

Tourism Website with Payment Gateway - Frontend Development (Group)

FEB 2023 - APR 2023

- Led frontend development of an educational tourism site with secure payment gateway and dynamic checkout.
- Built animated splash screen with timed redirection to homepage.
- Created interactive product shop UI with real-time pricing and quantity selection.

Student Progression Outcome Predictor - Using Python

OCT 2022 - NOV 2022

- Built a command-line app to classify student progression outcomes using university credit rules.
- Implemented input validation, modular functions, and data handling with lists, files, and dictionaries.
- Generated summary histograms and supported multi-record processing with loops and exception handling.

CERTIFICATIONS

• Azure AI Fundamentals, Microsoft	MAY 2025
• Python Course , University of Moratuwa	OCT 2023
• Web Designing, University of Moratuwa	MAY 2025
• SQL Essential Training, NASBA - LinkedIn Learning	AUG 2024
• Spring Boot 2.0 Essential Training, LinkedIn Learning	NOV 2024

ADDITIONAL INFORMATION

-
- **Languages:** English, Sinhala, Tamil.
